

**Recognition and Authorization to
Mr. Kim, Chang Woong**

August 1, 2016

In Solving the crisis of congestion, rising oil cost, global warming, JPods, Inc integrates on-demand mobility for people and cargo with solar collection to create a physical version of the internet using 1/10th the energy of current urban transportation for social, political, educational, health, and economic merits;

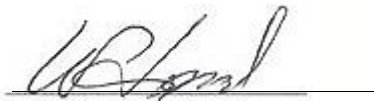

JPods' Desiring to introduce the world most advanced and the Greenest urban Transit technology as a tool for producing more economic value per unit of energy consumed while collecting that energy. Let energy self-reliance to benefit the generations to come.

Appealing to the same reason, we have extended our merit to Republic of Korea and appointing Mr. Kim Chang Woong as authorized Chief Marketing Director for development of JPods Solar Powered Personal Rapid Transit (PRT) Network in S. Korea for JPods, Inc.

Through the cooperation and symbiotic efforts and mutual participation in promoting the Green Renewable Energy Transport System can only provide an opportunity and possibility of increasing success for a greener world and a better place for people to live.

It is the desire and hope from this appointment to elaborate a greener , healthier transportation environment for people in S. Korea. This solar powered PRT has its remarkable development in reducing global warming; solving traffic congestion; self – sustainable in nature. It commences a dialogue in an effort to achieve a better, greener, and healthier urban transportation for all people.
